About the project

The INTREF project is mainly designed to meet the needs of immigrant students and solve their problems of social integration in schools and increase their academic performance.

The main objectives of the project

Determine needs and requirements in order to solve the problems of social adaptation of immigrant students.

Ensure the development of innovative training programs.

Increase skills and the competences of teachers working with immigrant students.

Determine methods and techniques in the field of educational services to immigrant students.

Ensure the sharing of experiences and good practices between the partner countries.

Target groups of the project

Primary school teachers, counsellors, sociologists, psychologists

Educational institutions, counseling centers, non-governmental, professional and professional organizations, employers, labor offices

Refugees children who are primary school students and their families

The main project results

1. International research on the situation in primary schools in partner countries
2. Training modules for primary school teachers
3. Educational program for refugees children
4. Interactive online platform with videos
